

Box Hill North Technology and Services Access Permission For Students in Years F–2

In order for us to provide an engaging learning experience for your child and address the AusVELS curriculum, we will be utilising digital technologies and online services to assist with our teaching, administration and student learning. These digital technologies and online services will be used in accordance with the following school policies and agreements listed below:

- Technology and Services eLearning Policy;
- Student Wellbeing Policy;
- Cybersafety Policy;
- Cybersafety Incident Reporting, Misuse and Resolution Policy;
- Technology and Services Acceptable Use Agreement.

We recognise it is almost impossible to give a complete and up to date list of every technology and services being used by the school. In light of this the following is a list of some core technologies and services we are currently accessing or plan to use during your child's learning as of the start of the calendar year.

Technologies being or planned to be used for 2015:

- 1-to-1 device/computer (currently Windows 7/8 based devices);
- Shared computers (currently Windows 7/8 based devices);
- Microphones;
- Video/Photo cameras;
- Projectors;
- iPads.

Security, Usernames and Passwords

The school manages these logons and has the ability to:

- Create new accounts;
- Update account details and information;
- Change usernames or passwords;
- Suspend access for a period of time;
- Permanently delete or remove student accounts and access.

Students in years F - 2 will receive:

- A shared computer (or Local Network) password and username which allows them to log on to school devices and access the school server to save and utilise files for their learning.
- A shared internet access password and username which allows them to access filtered internet at school.
- Various individual passwords and usernames, both shared and individual, in order to use and access online services, applications and programs (see table below).

Box Hill North Technology and Services Access Permission Acceptance

For Students in Years F-2

Once you have read and understood the Technology and Services listed in the permission request, please fill in this sheet and return it to your classroom teacher as soon as possible to enable your child access to school technology and services.

Student Name	Student Class	Student Year

I give consent and authorise the school to create an individual school network account. This will mean students will be given a password, username and permission to access and use computers on our network.

I give consent and authorise the school to create an individual internet access account. This allows us to give filtered internet access to the internet at school during school hours for your child.

I give consent and authorise the school to create accounts to the specific online services listed in this document and create and provide access to other services that require very limited information or I am notified of in the school bulletin. This allows us to create online accounts and services for your child to participate in learning tasks, activities, communicate and share ideas for school purposes.

Date:

Parent/Guardian Signature:

I, _____, have read through the Technology and Services Permission and listed school policies and authorise the school to act as written above.
